

06/15/2015

FOR IMMEDIATE RELEASE

Work on a highway improvement project on Highway US-6 between Hamlet and Palisade is scheduled to begin Wednesday June 17, 2015.

This project will involve replacing guardrail, patching on two bridges, widening the roadway two feet on each side, milling and overlaying the roadway with asphalt. The two bridges over the Frenchman Creek east of Hamlet will be controlled with lane closures and temporary traffic signals during construction. Travel through these segments during the closures will be restricted to 16 foot widths at the bridges. Traffic will be maintained during asphalt construction using flaggers and pilot vehicles. Travel through this segment will be restricted to a 12 foot width during the asphalt construction. Width restrictions will be updated using the Nebraska 511 Traveler Information website (www.511.nebraska.gov).

The prime contractor on the \$3.2 million dollar project is Paulsen, Inc. of Cozad Nebraska. The project is expected to be completed by late fall.
