FOR IMMEDIATE RELEASE

I-80 Reconstruction in Deuel and Keith Counties

Work has resumed on a complete reconstruction of the westbound lanes of I-80 between Big Springs and Brule, according to the Nebraska Department of Roads.

The nine mile, multi-phase project begins one mile west of Big Springs and continues to one and a half miles west of Brule. Phase three began in early April; traffic has been shifted to and maintained on the eastbound lanes of I-80. During phase three, the existing asphalt and concrete on the westbound lanes will be removed and a new concrete surface will be constructed. Traffic will be returned to normal in late October 2016. This project is expected to be complete by the summer of 2017.

Motorists are urged to drive cautiously through highway work zones.
