## FOR IMMEDIATE RELEASE

### Work to Begin on N-89 in the Stamford Area

August 22, 2016 (McCook, Neb.) — Weather permitting, work is scheduled to begin the week of August 29 on N-89, beginning at the intersection of N-89 and N-46 west of Stamford, and extending four miles east of Stamford on N-89. The project includes grading, asphalt, culvert and bridge work, according to the Nebraska Department of Roads.

Vontz Paving, Inc., of Hastings, Nebraska has the \$4,238,220 contract. Significant work through April 2017 includes partial construction of two triple box culverts and one quintuple box culvert, replacing a bridge at the respective locations. Temporary roads will be constructed over each segment allowing for bridge demolition and completion of the box culverts.

Travel through this segment will be maintained with traffic signals and signs; delays are expected to be minimal. A 10-foot width restriction will be implemented on N-89 during the bridge replacement phase. Other work includes rehabilitation of the existing pavement followed by a 3-inch asphaltic concrete overlay, grading, shoulder construction, and erosion control. Work on the project is anticipated to be completed by fall 2017.

The Department of Roads' project manager is Mark Dietz of Holdrege. Motorists are reminded to drive safely through work zones.
